

Medicaider™ (CHASSIS Financial Screening Tool)

Expanded Utilization and Interface Capabilities

CAN Community Council

July 2011

Kit Abney Spelce

insure-a-kid Director

CHASSIS Software and Medicaider™

- CHASSIS Software is a suite of software tools designed by Network Sciences
- Used for eligibility case management and program management
- Medicaider™ is a CHASSIS tool that provides a fast and accurate way to screen for a large set of healthcare programs
- Both are web-based tools used by healthcare organizations in Texas and across the Nation to efficiently and successfully connect the uninsured to benefit programs

CHASSIS Software and Medicaider™

- Providers use Medicaider™ to quickly and accurately screen patients for multiple benefit programs, and then to assist the patient through the entire process of completing applications, collecting required proof documentation, and filing to the correct agency
- Agencies can use Medicaider™ to electronically receive applications, determine eligibility consistently and accurately, and manage their program
- Medicaider™ is a paperless solution that can be used independently or to connect organizations online and includes reporting capabilities

“Transform the Eligibility Process”

Change the process of applying for and enrolling in financial assistance programs to become

- Efficient
- Less costly and much faster
- Transparent
- Manageable
- Compliant with policy

Integrated process between client, provider, and agency

Network Sciences Regional Vision

- Pre-Qualified (through Medicaider™)
- “No Wrong Door” for document collection
- Applications could be filled out and filed paperlessly to any participating agency/program
- Documents are filed electronically with application
- Providers see a real-time status update for all application packets filed
- Any clarification or pended activity could be communicated and resolved through the software
- Integrated eligibility determination and certification
- Common data system for verification

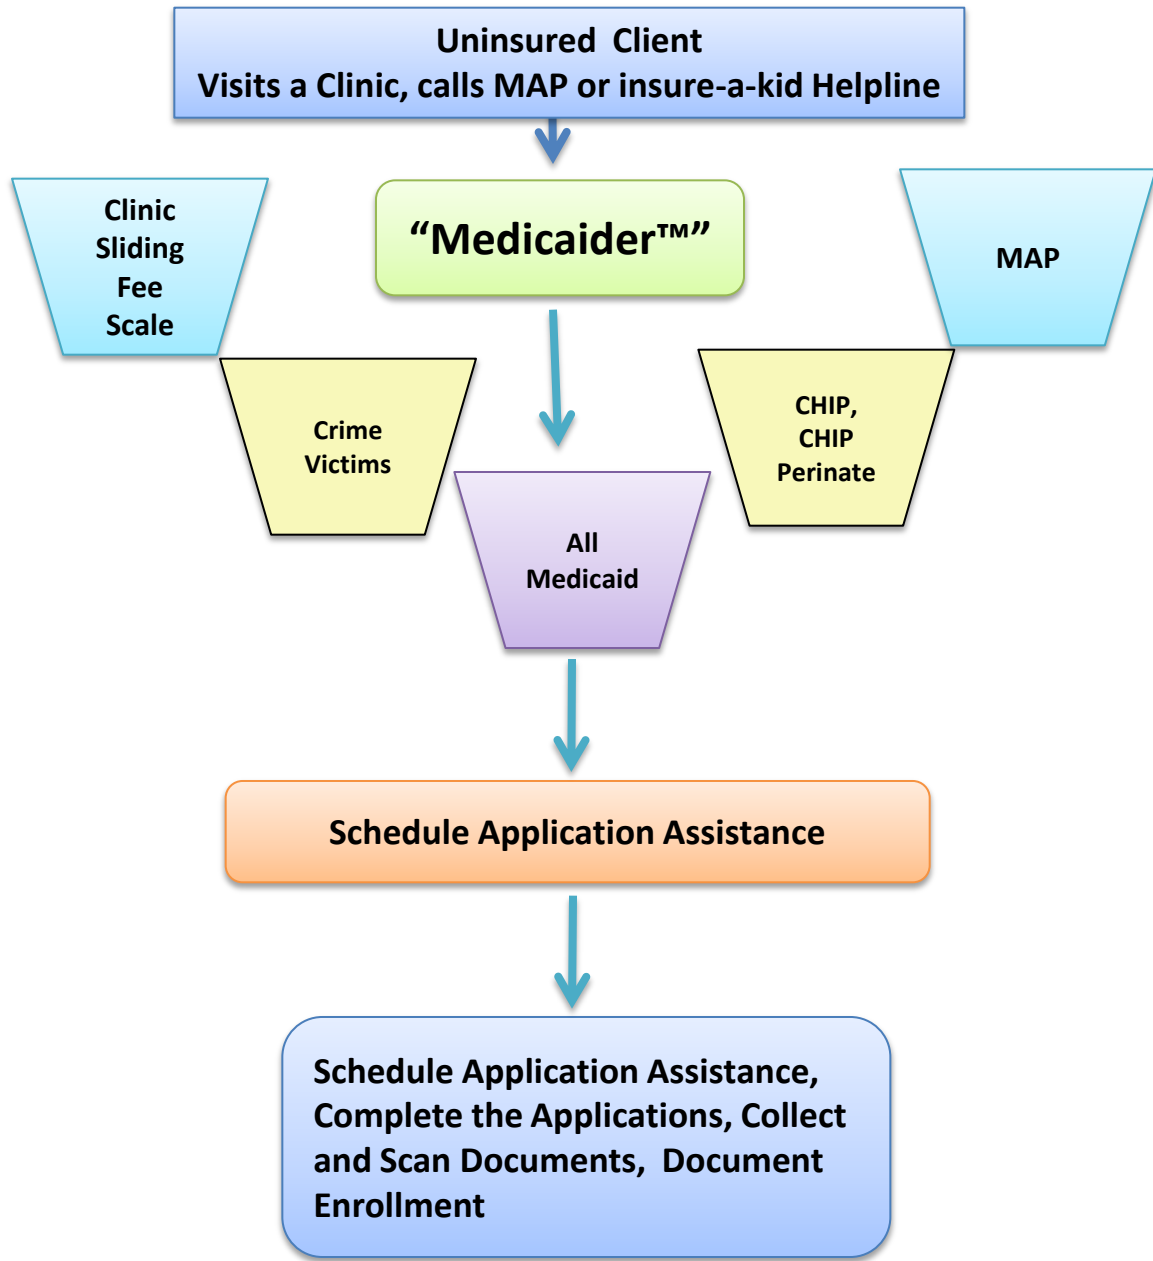

Integrated Care Collaborative CHUG Committee

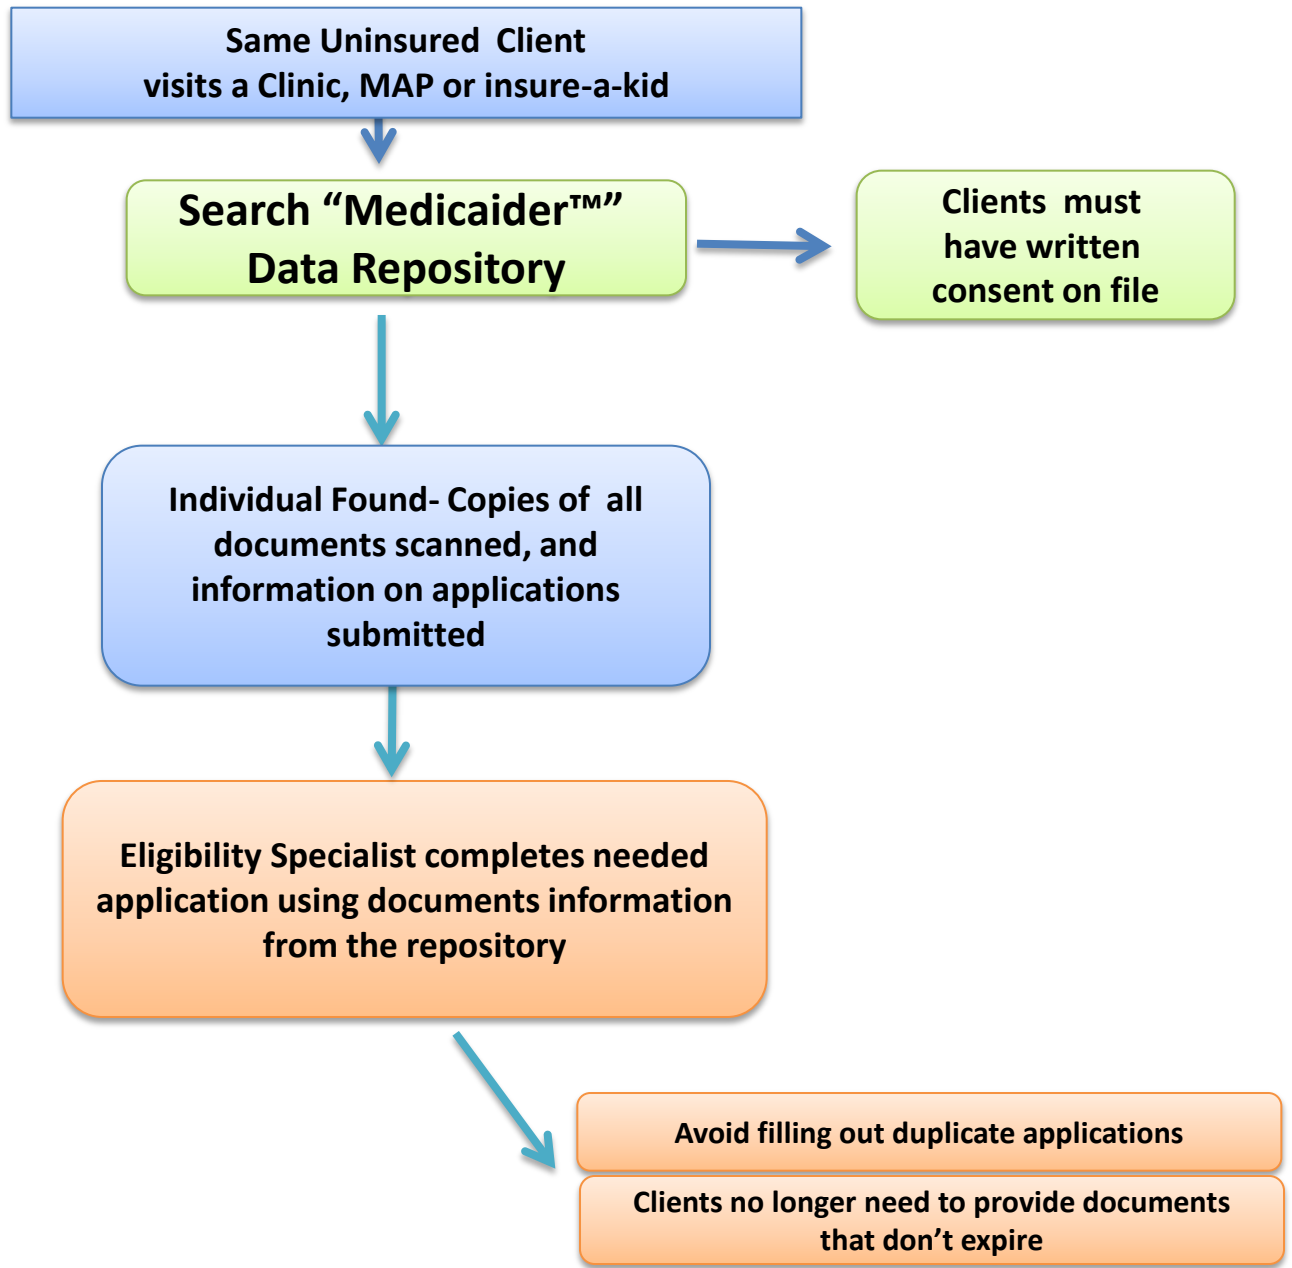

- CHUG – CHASSIS User Group
 - Open to all Integrated Care Collaborative (ICC) members
 - Purpose
 - Share common CHASSIS issues/needs/solutions
 - Streamline Eligibility Process

- CHUG Subcommittee
 - Central Health, insure-a-kid, Lone Star Circle of Care, ICC staff
 - Purpose
 - Advance objectives and report findings back to CHUG
 - Recommends CHASSIS data entry and workflow standards
 - Identifies which documents and data can/should be shared between organizations, maintaining HIPAA compliance

Current Action Items

- History of applications/screenings within ICC
 - Insight will avoid duplicate or unnecessary application from being submitted which can clog the system and delay applications
- Shared Documents within ICC
 - Ensure more complete, accurate patient program applications among ICC members
 - More patients *enrolled* in Medicaid/CHIP
 - Accurate data for sliding fee scales
 - Expanded Customer Service for Patient through Community Collaboration
- Repository for Screening Documents within ICC
 - Solve for outstanding consent concerns should patient not want to share with other ICC members

Same Uninsured Client visits a Clinic, MAP or insure-a-kid

Search "Medicaider™" Data Repository

Clients must have written consent on file

Individual Found- Copies of all documents scanned, and information on applications submitted

Eligibility Specialist completes needed application using documents information from the repository

Avoid filling out duplicate applications

Clients no longer need to provide documents that don't expire
